Tire 29x2.4 - Vittoria E-Mazza

SKU	3010002969

Vittoria E-Mazza

The e-Mazza is the ultimate tire for e-bikepacking and adventure riding, built to excel in unpredictable conditions. Designed for reliability, control, and outstanding grip under the added weight and speeds of e-bikes, it empowers you to tackle any trail with unwavering confidence.

When cornering or navigating off-camber rock slabs, the progressive shoulder siping offers varied tread edges that strike the perfect balance between precise trail feedback and unyielding grip. You can expect a ride that feels firmly planted, predictable, and completely within your control. On climbs, the staircase-style leading edges dig into the terrain, allowing you to conquer steep punchy rollers, loose surfaces, and challenging rocky sections with ease. The generous tread spacing effectively clears loose loam, gravel, and sticky mud, ensuring you maintain traction even when conditions turn adverse.

Whether you're exploring remote trails, taking on epic all-day rides, or pushing the boundaries of your e-MTB, the e-Mazza delivers the confidence and versatility you need to keep pushing forward.

Compatible with the Beeq models M700 (size M and L) and M850 (back wheel).

Size: 29x2.4
Color: Black
Weight: 1375g
