Tire 27.5x2.6 - Vittoria E-Martello

SKU	3010002966

Vittoria E-Martello

The Martello Enduro is designed for a variety of uses, from gravity competitions to exploration and back to racing. It excels on technical trails and performs well in challenging weather conditions, making it a proven choice for enduro and downhill at the highest levels. This tire has 4 optimised compounds strategically placed where needed for an unparalleled blend of speed, grip, and durability.

The tread features moto-inspired blocks that are reliable, durable, and thrive in both wet and dry conditions on technical terrain. The progressive siping throughout the tread creates a balance between thick and thin edges, allowing for responsive trail feel, excellent traction, and stability. You'll feel glued to the ground, in control, and experience a predictable rebound. The spacing between the knobs effectively gobbles up and clears away loose, loamy soil and muddy conditions.

Compatible with Beeq models M500, M700 (back wheel if it's 27.5") and M850 (back wheel).

Size: 27.5x2.6
Color: Black
Weight: 1245g
