Pedals - Union SP-827

SKU	3010000183

Pedals for city riding: grip and safety on every pedal stroke

Looking for tough pedals for your e-bike or city bike? The Union SP-827 has a wide, non-slip surface that gives your feet a firm footing, even in the wet.

The body and frame are made entirely of plastic, so the pedal will not rust and stays robust. Ball bearings keep the rotation smooth, and approved reflectors make you more visible after dark.

Why you'll like them:

Wide, non-slip surface for a firm footing
Designed for e-bikes, city and touring
Plastic body that will not rust
Ball bearings for smooth rotation
Built-in reflectors for better visibility
9/16" axle
