Universal Phone Holder - GUB P33

SKU	3010005358

GUB P33: your phone always in view

The GUB P33 is a bike phone mount with quick-release fixing: you put your phone on and take it off in seconds, and it stays firm even on uneven ground.

Which phones does it fit?

It holds phones from 60 to 100 mm wide, so it suits most models on the market.

Which bikes can I use it on?

It clamps onto the handlebars and suits every Beeq e-bike.

How does it keep my phone secure?

It combines a quick-release clip with a telescopic spiral rod, giving double protection against falls and vibrations. The fixing wings are anti-slip, the base has an L-shaped support for extra stability, and a silicone pad is included to help absorb shocks.

Can I use my phone in portrait and landscape?

Yes. The mount rotates 360° horizontally, so you choose the position you prefer, portrait or landscape.
