Frame Lock - AXA Imenso X Large

SKU	3010004648

AXA Imenso X Large

The AXA Imenso X Large is a high quality frame lock with an innovative design and the option to link a ULC plug-in chain to the lock so you can lock your bike to a fixed object.

The Imenso ring lock offers optimal safety with its anti-drilling cylinder and hard-ened steel bracket. The ergonomic design of the push button offers you maximum comfort. If it happens that you lose your bicycle key, that is no problem. An extra key can be ordered via the AXA online key service and will be delivered within a few days.

The AXA Imenso X Large can be mounted in several different ways. The lock is standard mounted on mounting holes in the frame of the bicycle. If there are no mounting holes in the frame of the bicycle to mount a ring lock, you can order and use the AXA Flex mount strips.

The Imenso X Large has an extra wide opening of 92mm so that it also fits wide fenders or ballon tires. This ring lock has the color black.
