Bell with AirTag holder

SKU	3010004749

A bell to alert, a tag to find

The AirBell bike bell draws the attention of passers-by to you and offers a clever hiding place for your Apple AirTag. The AirTag can be completely integrated into the bell and thus remains protected from prying eyes. This increases the chance that if you lose your bike, you'll be able to find it again via Apple's "Find My" network. The AirBell bicycle bell is suitable for all standard handlebars with a diameter of 22.2 mm in the grip area.
